ABOUT

The Comet Composting Program is UTD's initiative for students living on campus to compost organic material easily and free of charge. Since 2012, UT Dallas has composted over 500,000 lbs. of food waste, therefore diverting 81 tonnes of CO₂ from the atmosphere campus-wide. Since expanding the Comet Composting program into Housing in September 2018, over 11,000 lbs of food waste has been composted from on-campus resident participants.

Beginning in 2022, the Office of Sustainability began a partnership with **Turn Compost**, and compost drop off stations were expanded from three to eleven locations, including expanded service to Dining Hall West, Canyon Creek, Northside, University Village, residence halls, and the campus core.

STEPS TO COLLECT CADDY

Thank you for being interested in Comet Composting!

Once you have completed the composting quiz, please go to Construction Management Trailer 2 (pictured below) to pick up your caddy. You may pick up your caddy at your convenience from Monday through Friday (8am - 5pm). The office is not open outside of these hours.

Once you arrive, please let yourself in and pick up a caddy from the entrance. **Please take one of the available caddies and write down your name, net ID, email, and caddy number on the available sheet located on a shelf above the caddies (picture on next page).**

Each caddy comes with two liners which are suggested to last around 2-3 weeks. If your caddy is not clean or does not have two liners, please contact one of the Office of Sustainability staff members.

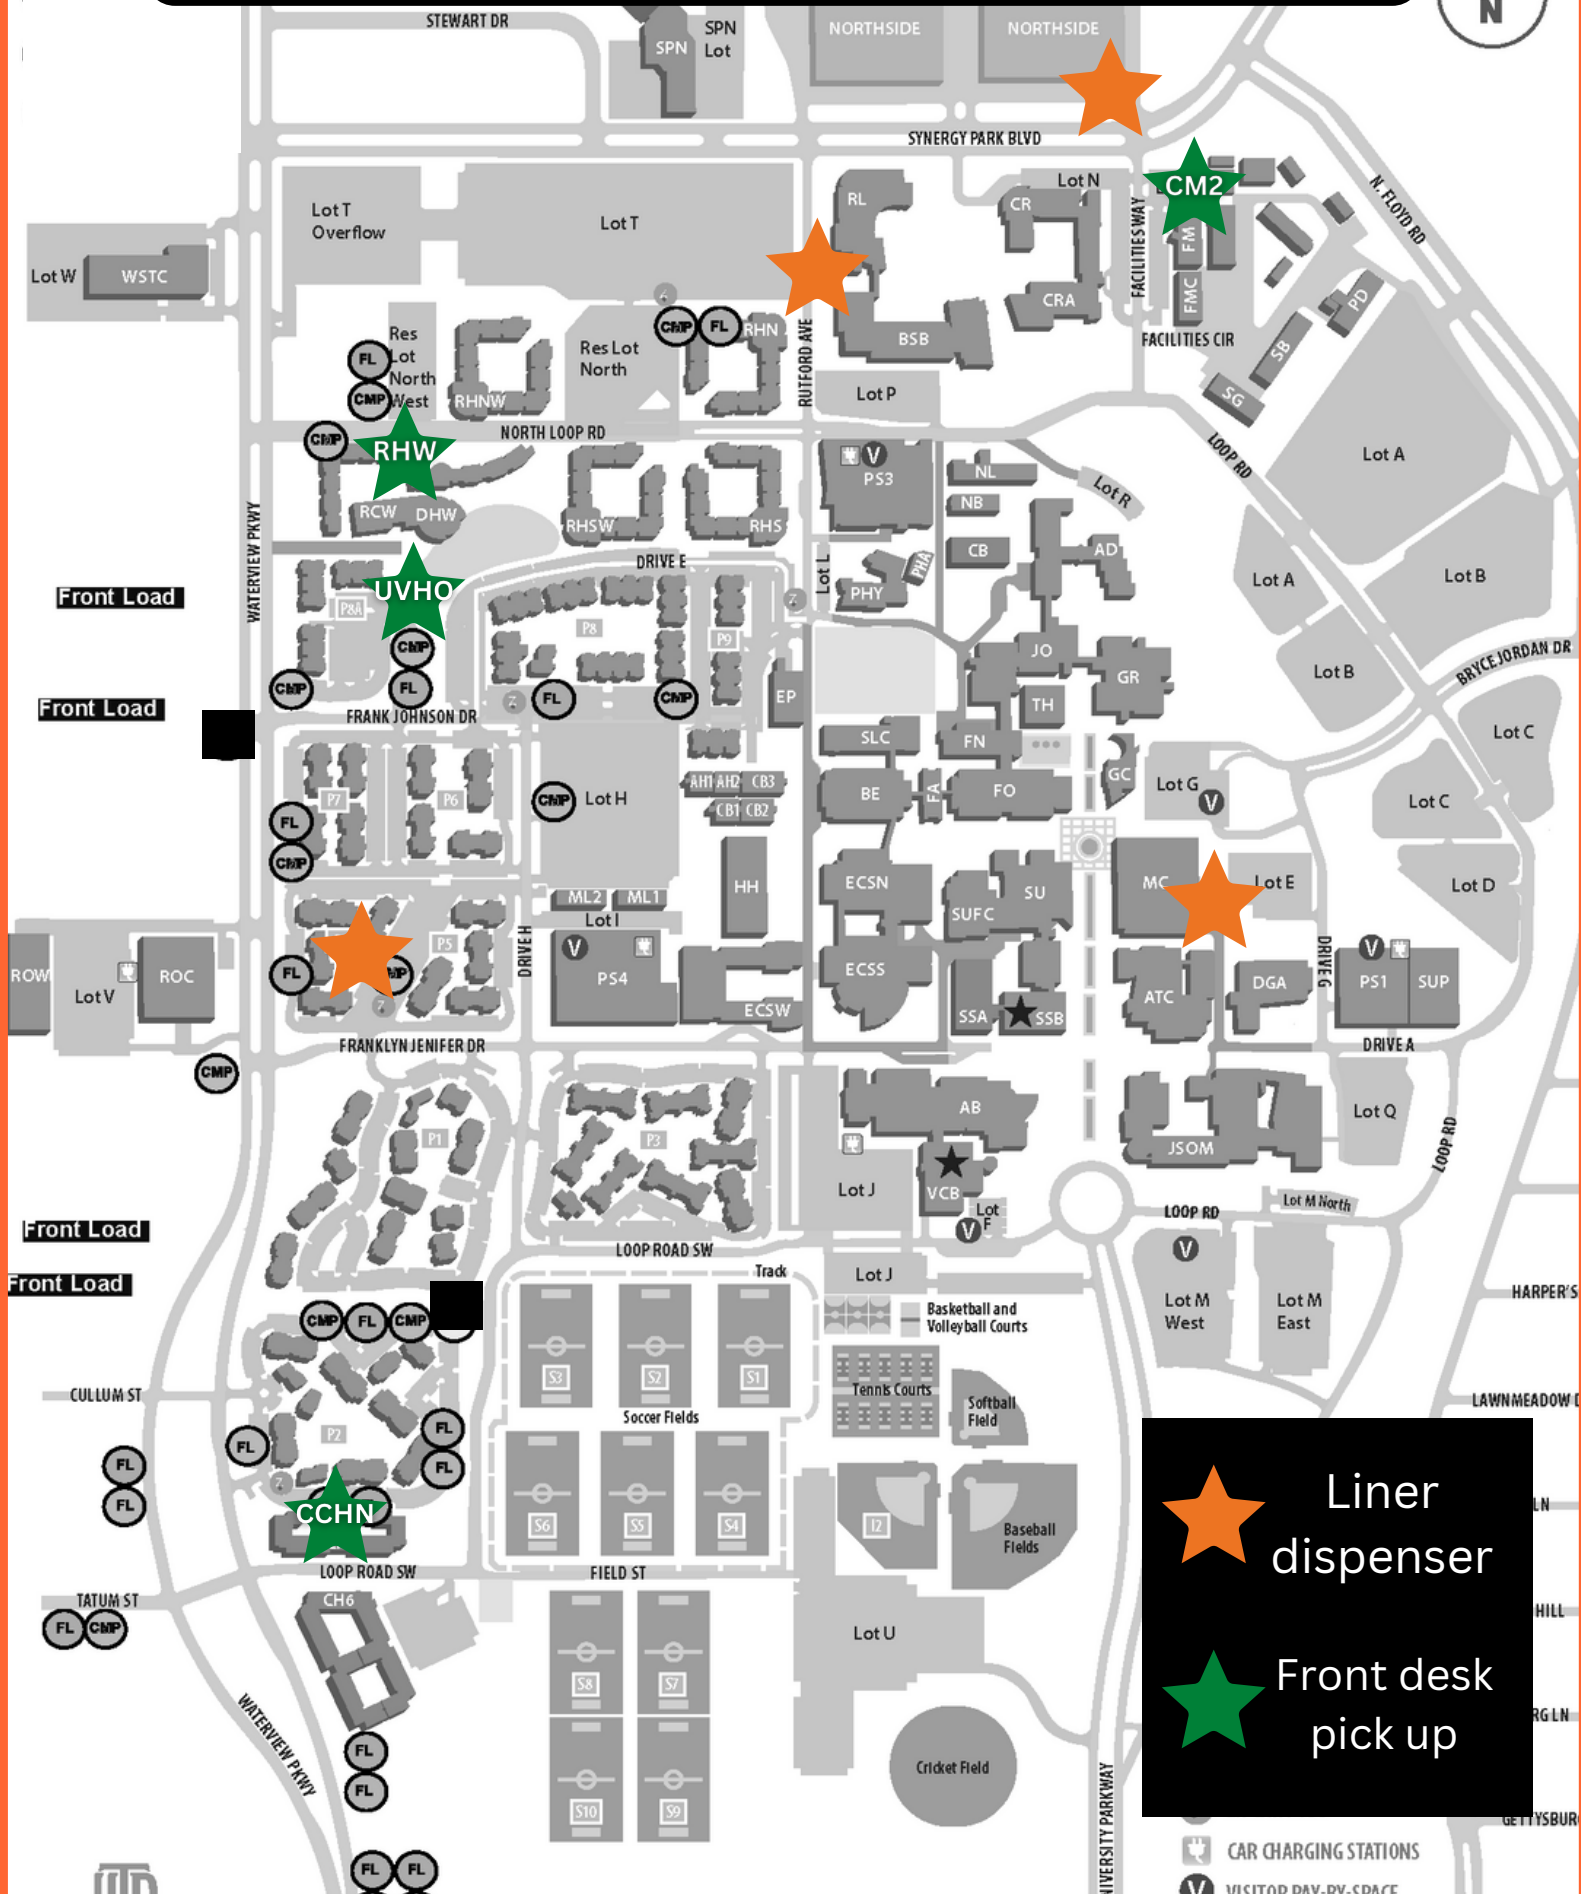

LINER LOCATIONS

Liner locations can be found at the following locations (map available on next page):

- Residence Hall West
- University Village Housing Office
- Canyon Creek Heights North
- Construction Management Trailer 2

Comet Composting Bin Liner Pick Up

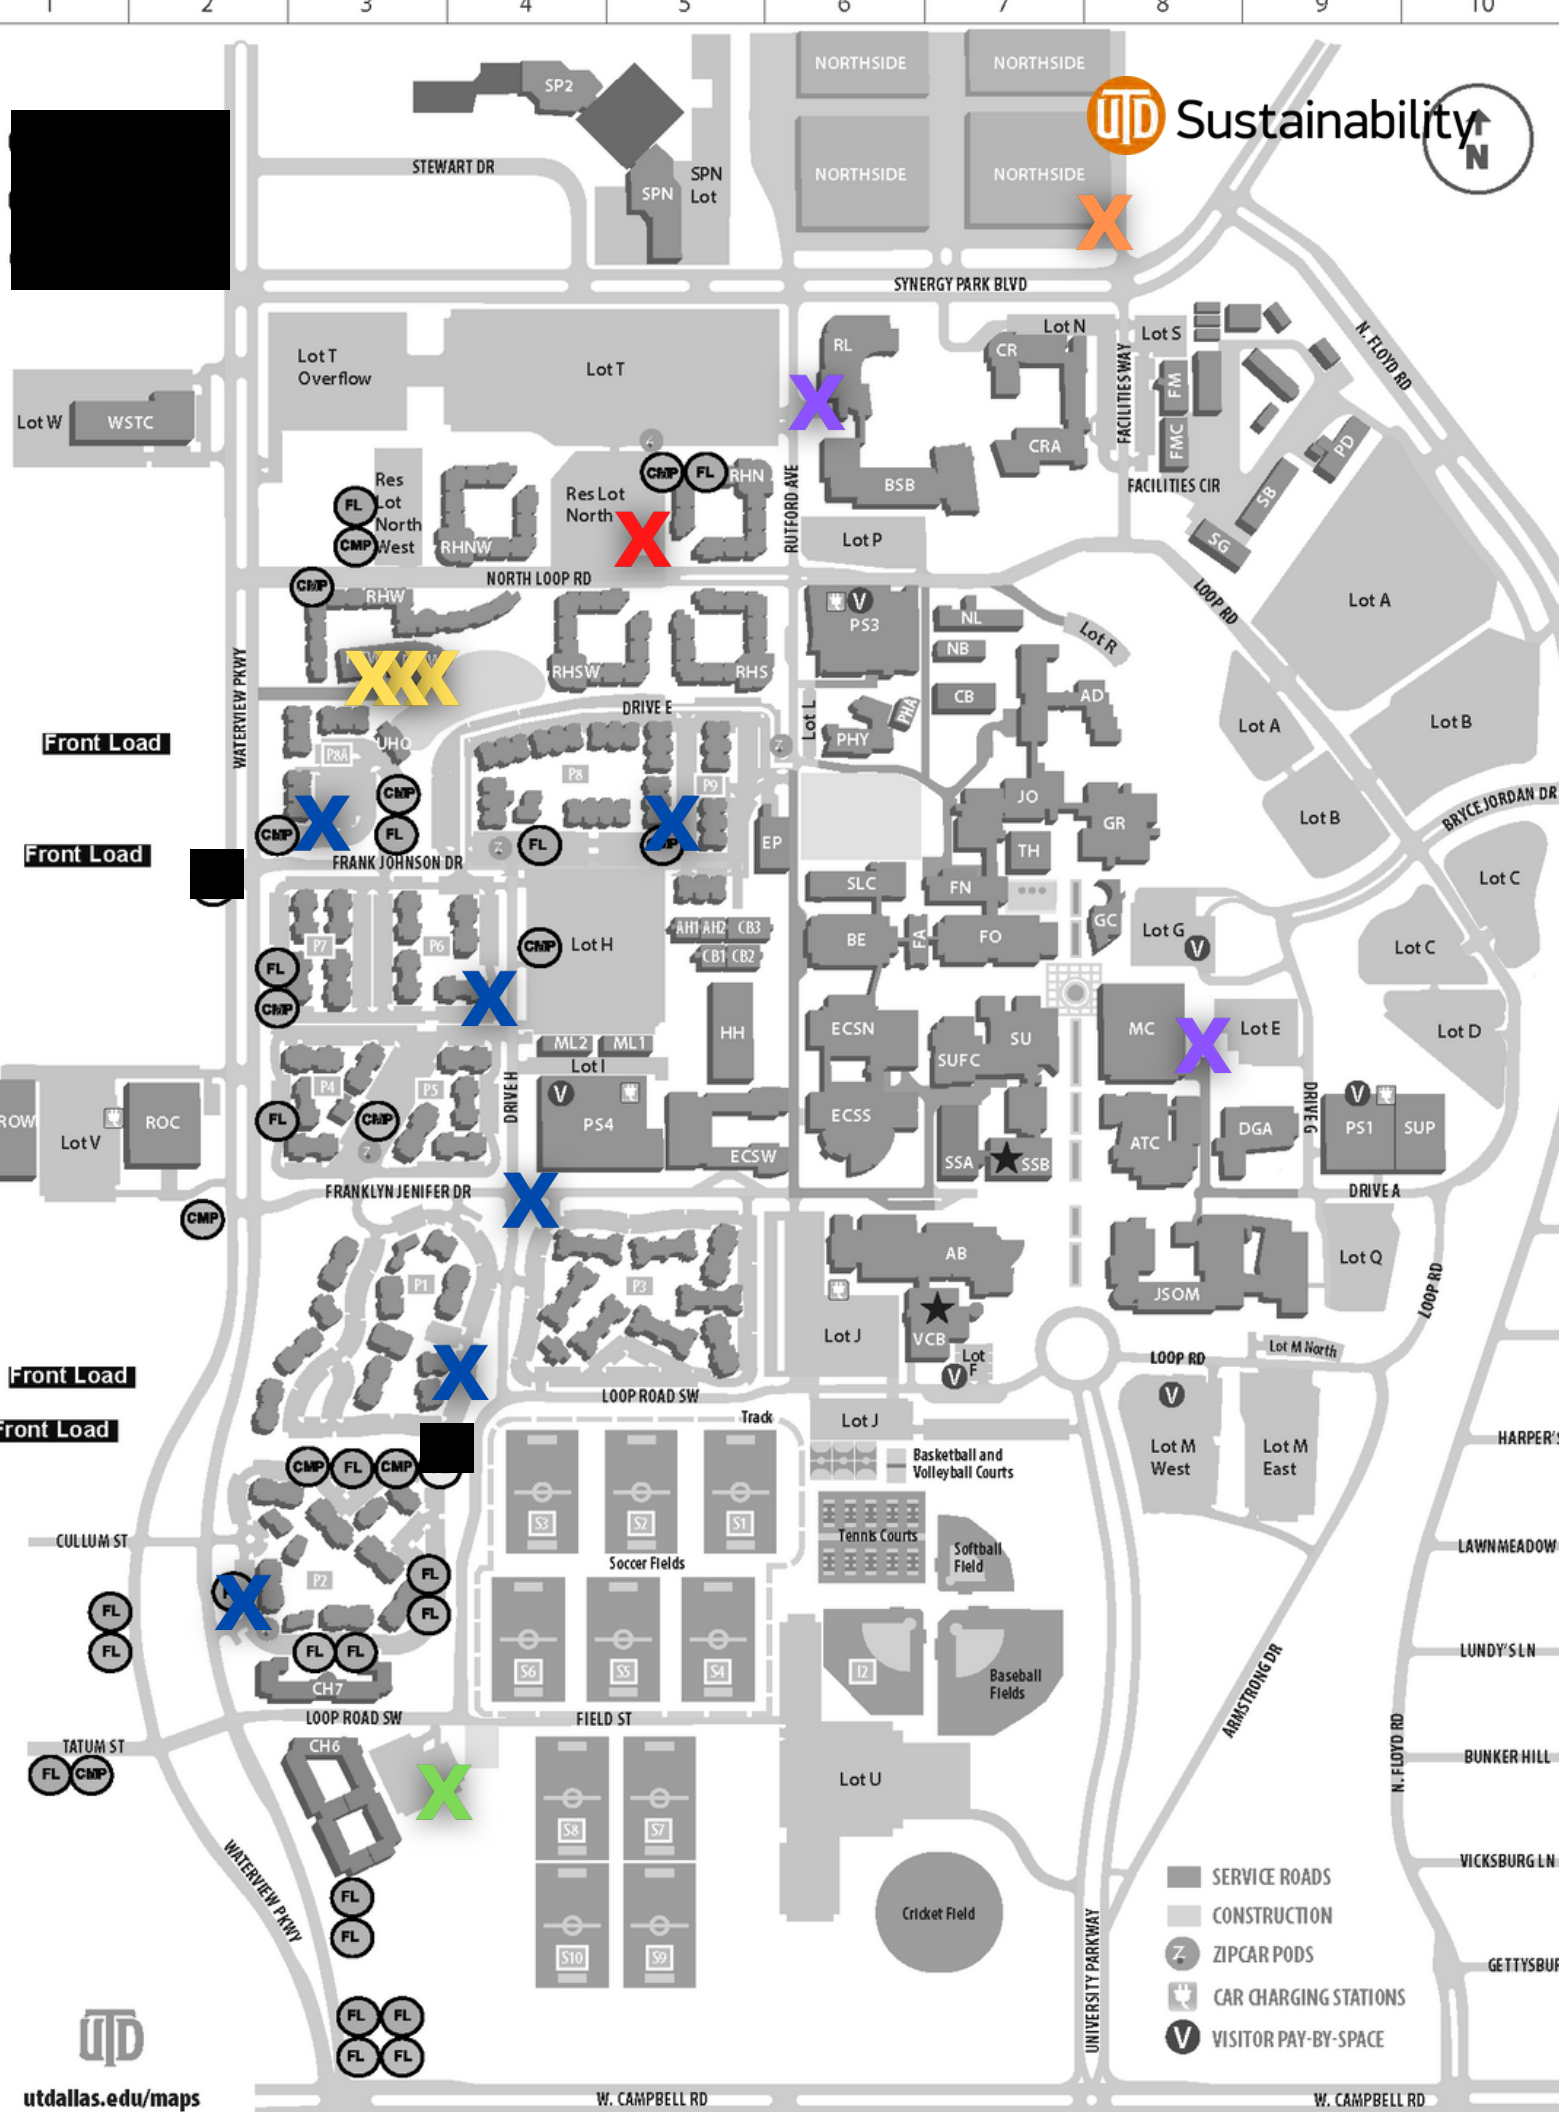

Email sustainability@utdallas.edu for dispenser refills.
