

## Green Labs

# USE LESS...

# DISCOVER MORE!

Easy steps to becoming a Greener Lab:

### Waste Minimization and Recycling

Purchase reusable supplies. Recycle special stream materials such as plastic film and styrofoam. ([www.utdallas.edu/sustainability/recycling](http://www.utdallas.edu/sustainability/recycling))

### Energy Conservation

Reduce energy use in electronics as well as laboratory equipment. Lower the sash of fume hoods while not in use.

### Green Chemistry

Use safer and more environmentally friendly chemicals. One resource is MIT's Green Chemical Alternatives Wizard.
