RESTORING, REBUILDING, REGENERATING ONE SEED AT A TIME

www.joppymommas.org

This course will acknowledge residents as experts in directly shaping their environment. Students will work with community members to understand opportunities and challenges related to food equity, sustainable development and community identified priorities and values.

In partnership with Joppy Momma's Farm, design-build activities seek to contribute to the equitable redistribution of resources locally and the stewardship of positive neighborhood change.

Food systems within 5-mile radius
