How friendly are Arlington streets for pedestrians and cyclists?

BY KALEY BROUSSARD

JULY 07, 2021 05:15 AM, UPDATED JULY 08, 2021 04:45 PM

Members of Walkable Arlington discuss the Center and Abram Street intersection with Victoria Farrar-Myers, District 7 city council member, right. The trio was part of an audit of downtown safety conditions and motorist behavior in June. KALEY BROUSSARD

Dedicated Bike Lane
Pittsburgh, Pennsylvania

In too many communities, people can't safely walk to where they need or want to go due to a lack of sidewalks, crosswalks or other safety features that make streets safe for pedestrians and drivers.

A walk audit is a simple activity in which an individual or a team observes and evaluates the walkability of a location to document how and if pedestrians can safely travel along a street, navigate an intersection and get from point A to B, C and so on.

Who can conduct a walk audit? Anyone!

The **AARP Walk Audit Tool Kit** can be used by local leaders, advocates, community organizations and residents to ...

- enable people to get around without having to drive
- help reduce traffic congestion and pollution
- inspire the development of pedestrian-friendly streets
- increase exercise opportunities for people of all ages
- gather input about community infrastructure needs
- educate residents about street design elements that support safety
- encourage social interactions among neighbors
- give a boost to property values
- empower community leaders and residents to be the agents of needed change

The **AARP Walk Audit Tool Kit** is free and available for download or order.

Working toward walkability: City to improve sidewalks

By Lillian Juarez, The Shorthorn staff Apr 27, 2022 0

Government

A new sidewalk is cause for celebration in a historic Arlington neighborhood. Here's why
